## Our Golden Rules for Environmental Responsibility

---

### Recyclable products

all our products are design and manufacture to be recyclable once reaching to the end of there use.

### Using recyclable raw material

we are doing our best to continually increase the volume of recycled raw materials used for production of our product range.

### Corporation with our suppliers

we are permanently working in corporation with all our supplier to use the highest possible level of recyclable raw material of all purchase items required to the production of our product range.

### Long lasting use of our products

our product range is design from first stage to last long years of use – we do not produce products for a single use at all.

### Green energy

after investing in our own solar system, built up at our production facility we are supplying by ourselves 25% of our required electricity for production, green and clean solar energy.

### Industrial waste

as industrial manufacturers all over the world, we also produce industrial waste, which we take care to dispose to professionals' waste site, which part of it is cleaned and returned for production.
